

VirtualDrive® 11

The VCD Manager lets you organize your virtual discs in cabinets for easy retrieval and play.

VirtualDrive 11 is a CD emulator that converts CDs and unprotected DVDs into “virtual CDs” – MP3-like files that you can play in place of physical discs. These virtual CDs (VCDs) run directly on your hard drive, saving wear and tear on your CD-ROM drive and extending the battery life of laptop computers. They can be shared over a network and have access rates up to 200 times faster than physical CDs, boosting the performance of PC games, photo CDs, and disc-based applications.

You can operate several VCDs simultaneously in up to 23 “virtual drives,” swapping them out for a seamless transition between volumes of a game. VirtualDrive’s simple, user-friendly GUI lets you create unlimited VCDs and manage them in a searchable virtual CD library. Archive your VCDs in a searchable library, customize them with your own tracks and documentation, and easily store them on a hard drive, a network share, or a USB device.

FEATURES & BENEFITS

- **Multiple Windows® OS Support:** While fully ready for Windows Vista, VirtualDrive still runs on XP and 2000 64-bit and 32-bit systems
- **Portability and Convenience:** Like MP3s, VCDs can be saved to a hard drive, network, or USB device, easily transported on any number of media, and played by clicking desktop shortcuts
- **Optimal Performance:** VCDs run directly on the hard drive, eliminating CD/DVD-ROM read and write times and spin-up delay
- **Data Backup:** Protect your CDs from loss, damage, or theft by creating high-quality, compressed digital copies and saving them to your hard drive
- **Multiple Disc Play:** Run up to 23 programs simultaneously in your virtual drives. There’s no need to swap out physical discs
- **Copyright Protection Support:** VirtualDrive 11

supports many of the newest titles with DVD SecuROM, SecuROM 7, StarForce 3, SafeDisk1, SafeDisk2, LaserLock, and SMARTe protection

SYSTEM REQUIREMENTS

- **CPU:** Intel Pentium 233 or higher
- **RAM:** 128MB or more
- **Hard Drive:** 50MB free space
- **Operating System:** Windows 2000, XP, Server 2003, or Vista (64-bit or 32-bit systems)
