

VirtualDrive® Pro 11

The VCD Manager lets you organize your virtual discs in cabinets for easy retrieval and play.

VirtualDrive Pro 11 CD emulator converts CDs and unprotected DVDs into compressed images, or “virtual discs,” which it plays in any one of up to 23 “virtual drives.” These virtual drives, created in the software, show up as drive letters in Windows® Explorer and run directly on the hard drive with access rates up to 200 times faster than CD/DVD-ROM drives. The result is more responsive, quieter playback, less wear and tear on a computer’s hardware, and complete freedom from physical discs, which can then be left at home, safe from theft or damage.

Load several virtual drives simultaneously and switch from one virtual CD (VCD) game or application to another without having to handle physical CDs or wait for a disc to spin up. Archive your VCDs in a searchable library and easily store them on a digital device. The Professional edition of VirtualDrive comes with a full version of Virtual Hard Drive Pro RAM disk software, which runs files and applications in memory, completely bypassing the mechanical hard drive while processing information up to 340 times faster.

FEATURES & BENEFITS

- **Multiple Windows OS Support:** While fully ready for Windows Vista, VirtualDrive Pro still runs on XP and 2000 64-bit and 32-bit systems
- **Portability and Convenience:** Save your VCDs to the hard drive of a laptop computer, to a network share, or to a USB device. Easily transport them on any number of digital storage devices. Launch them by clicking on custom desktop shortcuts
- **Optimal Performance:** VCDs run directly on the hard drive, eliminating CD/DVD-ROM read and write times and spin-up delay
- **Data Backup:** Protect your CDs from loss, damage, or theft by creating high-quality, compressed digital copies and saving them to your hard drive
- **Virtual Hard Drive Pro:** Run applications in unlimited RAM up to 340 times faster than on your hard drive
- **Multiple Disc Play:** Run up to 23 programs simultaneously in your virtual drives. There’s no need to swap out physical discs

- **Copyright Protection Support:** VirtualDrive Pro supports many of the newest titles with DVD SecuROM, SecuROM 7, StarForce 3, SafeDisk1, SafeDisk2, LaserLock, and SMARTe protection

SYSTEM REQUIREMENTS

- **CPU:** Intel Pentium 233 or higher
- **RAM:** 128MB or more
- **Hard Drive:** 50MB free space
- **Operating System:** Windows 2000, XP, Server 2003, or Vista (64-bit or 32-bit systems)
